Specified Requirements Place ☑ or 図 in box	Mark	
PHP common static includes:		
menu, footer, header, static code blocks included $\ \square \ \square \ \square$		
<b>settings.php</b> created, included and used $\square$ [1]		
Orders Table (view in phpMyAdmin)		
- scheme can store all the necessary data $\square$ [1]		
- primary key order_id auto generated $\square$ [1]	/2	
enquire.php payment.php part2.js	<u> </u>	
- client-side HTML5 form validation disabled $\Box$ $\Box$ [1]		
- client-side JS form validation disabled [1]	/2	
process_order.php	12	
- unable to access directly through URL [1]		
- all data read from payment.php [2]		
	/4	
- text data inputs sanitised [1]	/4	
Data errors validated, displayed back in fix_order.php		
- fnames □ [1] Inames □ [1] email □ [1] str_addr □ [1] state □ [1] pcode □ [1] phone □ [1]		
- preferred contact □ [1] qty □ [1] product □ [1] options □ [1]		
- total cost calculated [1]		
- CC type □ [1] CC name (alpha) CC number (15-16 digits) □ [1] CC expiry date □ [1]	/4.0	
- CVV □ CC formats checked □ [1] post code checked against state □ [1]	/18	
fix_order.php	/11	
- all data sent from <b>process_order.php</b> to fix_order.php [4]		
- all data displayed in form [ (CC details not sent shown blank) [4]		
- errors displayed in page [2]		
- form submits all data back to ${\sf process\_order.php} \ \Box \ [1]$		
receipt.php		
- all data sent from <b>process_order.php</b> to receipt $\square$ [2]		
- all order data displayed in receipt page $\square$ (Secure CC details shown ****) [2]		
- record added to orders table by <b>process_order.php</b> (view in phpMyAdmin) $\square$ [10]	/14	
manage.php		
- linked from menu $\square$ [1]		
- form to make queries, with required options $\square$ [1]		
- results in HTML table order fields (#,date,product,cost,name,status) $\square$ [6]	/8	
Manager can query:		
- all orders $\square$ [1] - orders for a customer based on name $\square$ [2]		
- orders for a particular product $\square$ [2] - orders that are pending $\square$ [2]		
- orders sorted by total cost $\square$ [2]		
- can 'update' status of an order (pending   fulfilled   paid   archived) $\square$ [2]		
- can 'cancel' a pending order $\square$ [2]	/7	
Create database table automatically (in process_order.php)		
- creates 'orders' table if it doesn't exist on first order $\square$ [10]	/10	
(can be tested by dropping table in phpMyAdmin)	,	
• • • •	/80	
Subtotal	,30	

## Enhancements listed and linked from enhancements3.html

Maximum of 2 Enhancements will be assessed (put your best ones at the top of the list). Poorly implemented or trivial enhancements may receive zero marks.

Feature Name	Described	Linked	Sourced	Mark

## **Other Deductions** based on demonstration, documentation, code and file inspection

Requirement		
HTML		
- Deprecated elements/attributes have been used [-5]		
- Inappropriate use of HTML semantics [-5] (e.g., use of <div> when <section> <article> should be used)</article></section></div>		
- HTML usability does not follow standards (e.g., alt on images, label in forms, tables) [-5]		
- HTML Image height, width attributes missing or incorrect [-5]		
- HTML has embedded Style markup. CSS is not fully separated from HTML [-5]		
- Code comments inadequate to inform later code understanding/maintenance [-5]		
- HTML webpages not fully valid [-5 each webpage]		
PHP (deduct up to 5 marks each)		
- Inappropriate header comments - do not match in-house standard. [-5]		
- Code comments inadequate to inform later code understanding/maintenance [-5]		
- Uses only mysqli commands [-5]		
Web site		
- Directory and file structure not as specified [-10]		
- Third party content inadequately acknowledged [-10]		
- Failure to acknowledge third party code or content at all is plagiarism and may result in zero marks for		
this assessment, or other penalties in accord with Swinburne policy. [-100]		
Other Deductions		
- other deductions not listed above [-100]
